

The Property Jungle

Quick Content

**For time-pressed
estate agents**

Basic SEO friendly

Affordable

Stress-free

Industry specialist

Quick turn around

**Personalised to fit
your business**

Personalised to fit your business

At The Property Jungle, we know the property industry inside out. We also know how hard it is to find the time and often the words to create just the right website content to fit your business.

We can help by creating personalised content that encapsulates your business and covers all of the services you provide.

As we are experienced property industry people, you don't need to waste your precious time explaining all the ins and outs of the industry, you just need to tell us:

- **the tone, such as modern upbeat, or traditional business-like**
- **the pages required**
- **the services you offer**
- **the areas or specific locations you cover**

We can work out the rest for you. Perfect for when you just want to get the job done.

Affordable

No business has a bottomless pit of ready cash to spend, that's why we make creating your content incredibly affordable.

All jobs are quoted individually, and more complex or in-depth, high-volume, or more stylised content may incur additional costs which will be agreed upon beforehand.

Content costs start at:

- Standard Website Page: £55.00 +vat
- Area Guides: £75:00 +vat

Content is billed separately to website build costs and may be billed on completion, not on website launch.

Once created and approval requested, edits can be made for a 2-week period by our content writers. Should none be requested, all further edits will be the responsibility of the website owner.

Stress-free

To make things even more simple, we can also add your new content directly to your live or development site, so that you can see it in context.

Once in situ, your content is fully editable and we are happy to make changes, as requested within a 2-week window of submission for review.

You are then free to make changes yourself via your website's CRM.

As content is a very personal thing, and one person's taste will be different from the next's, we know that you may want to add your own personal touches and you can do so at any point.

We will provide you with CRM login details and talk you through this very simple and straightforward process.
